## HOW TO PLAY

- Turns consist of playing one card in a free space on the board. **Gold** player goes first.

- When playing a card next to an opponent's card, the two cards will battle:

- Compare the numbers on the **two touching sides** to determine the winner!

## SETUP

- Designate one player as the "silver" player, and one player as the "gold" player.

- Gently shuffle deck & deal 10 cards to each player. Orient cards so they are upright and the player's color is facing up.

- Board: Set up a 4x4 area that fits 16 cards in a square pattern when laid out. Use tiles, paper, etc. to define the shape, if desired.

- Both numbers **higher** on attacking card? **Attacker wins.** Flip defending card over.

- Both numbers **lower** on attacking card? **Defender wins.** Flip attacking card over.
- Either number **equal**? Or one number **higher**, one number **lower**? **A draw.** No cards flipped.

- Elements (optional): Add +1½ to attacker's card values when attacking opposite element:

- **Game ends** when all board spaces are filled. **The player that controls the most cards wins!**
